GAINDAY CLIENT TECHNICAL DOCUMENTATION

Simulation Interfaces & Grading Guide

A visual reference illustrating candidate workspaces, task types, dynamic role determination, and how every submission is accurately graded.

1. Role & Sub-Role Determination

Sub-roles in Gainday are **not fixed categories**. They are flexible sub-domains dynamically inferred from the job description's responsibilities, tools, and outputs.

Customer Service (Sample Observed Sub-Roles)

Tier 1 Support (Email & Chat) • Complaints & Escalations • Technical Support • Contact Centre • Support Lead & QA • Retention

Finance (Sample Observed Sub-Roles)

Reconciliation • Financial Reporting • Accounts Payable / Receivable • Budgeting & Forecasting (FP&A) • Audit & Treasury • Private Equity

Sales (Sample Observed Sub-Roles)

SDR / BDR (Outbound Prospecting) • Account Executive (Closing & Negotiations) • Enterprise / Account Management • Sales Operations / Inbound

Cross-Functional / Generic Roles

Any domain outside the above (e.g., Logistics, Operations, People/HR, Product). The system extracts the posting's own 2–4 word domain name.

> **How Determination Works:** The AI classifier evaluates actual day-to-day tools and deliverables (e.g. Zendesk, Excel financial modeling, Salesforce pipeline) rather than relying on job titles. The employer's top-level role choice is respected, while the dynamic sub-role refines candidate task selection and scopes anti-repetition checks.

2. Candidate Interfaces & Grading Mechanics

What the candidate sees on their screen and how their response is verified:

1. Case File & Text Area

`CASE_FILE_TEXT_AREA`

Task Types Covered: Policy-Bound Ticket Reply, De-Escalation & Boundaries, Compliance Gates, Diagnostic Questions, Escalation Handoff, Ticket Triage.

Candidate Workspace — Policy-Bound Support Case

Customer Record | ★ Ticket #4920 (Active) | Policy Guidelines

Customer: Mark Jenkins • **Plan:** Growth ($149/mo) • **Time:** Today, 09:14 AM
"I was away on sick leave and couldn't request a refund within your 30-day window (it's day 38 now). I demand an exception and a full cash refund to my credit card!"

YOUR CUSTOMER REPLY (REQUIRED: 6–10 SENTENCES):

Dear Mark, thank you for reaching out and I hope you are feeling better. While our system cannot process cash refunds outside the 30-day window, I am authorized to immediately issue a full $149 store credit to your account balance with no expiration date...

⚙️ OBJECTIVE MACHINE GRADING

When paired with selection tools (Diagnostic Questions, Ticket Triage), candidate choices are checked against pre-computed keys (e.g. correct 2 diagnostic questions picked; unambiguous first-priority ticket).

📝 OPEN-ENDED RUBRIC GRADING

Scored across 4 criteria (Judgment, Written Communication, Problem Solving, Domain Awareness) against 5-point anchored rubrics. **Hard Safety Gate:** Violating policy or making unauthorized refund commitments triggers an auto-fail cap.

2. Staged Chat (Interactive Turn-by-Turn)

`STAGED_CHAT`

Task Types Covered: Frontline Helpdesk, Live Chat Support, De-escalation Conversations.

Live Chat Simulation — Turn 2 of 3

Customer Dossier:
Account: FastShip VIP
Tracking: #FS-99120
Carrier Photo: Gate dropoff at 8:15 AM.

Policy Rule: Claims require driver GPS re-check before approving redelivery.

"My package says delivered, but nothing is outside! I need this delivery today for a presentation!"

"I completely understand the urgency! Let me pull up the carrier GPS scan and driver photo for your building right away."

Customer is typing...

Type your response... (Word limit: 15–40 words) Send

⚙️ OBJECTIVE MACHINE CHECKS

Automatically enforces turn completion (3–4 scripted turns), word count boundaries per message (15–40 words), and timing limits.

📝 OPEN-ENDED TRANSCRIPT GRADING

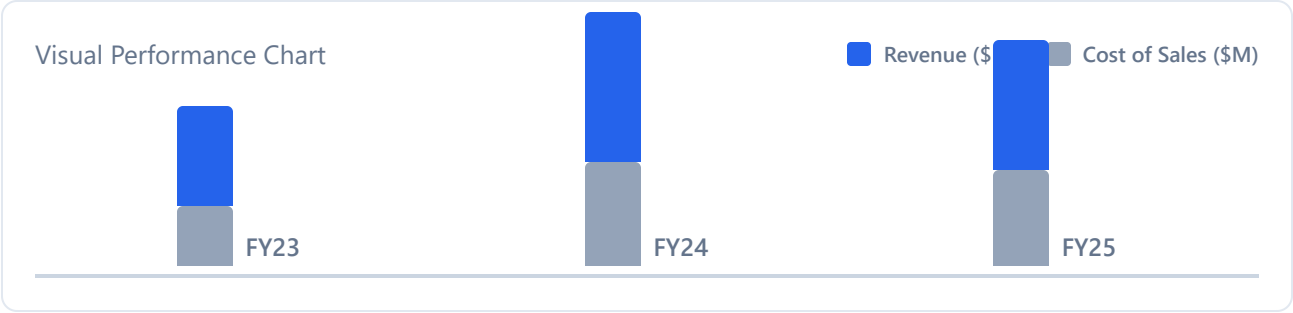

The entire conversation transcript is evaluated holistically by an anchored AI judge for conversational pacing, customer de-escalation, tone, and policy adherence.

3. Table View with Chart

`TABLE_VIEW_WITH_CHART`

Task Types Covered: Margin Statement Analysis, Revenue Trends, Revenue & Units Combos, Variance Waterfall Bridges.

Financial Performance — Statement Analysis

Line Item (USD)	FY23	FY24	FY25
Revenue	$60,000,000	$85,000,000	$72,000,000
Cost of Sales	$36,000,000	$59,500,000	$54,000,000

Enter Gross Margins: FY23: 40.0 % FY24: 30.0 % FY25: 25.0 %

EXECUTIVE COMMENTARY TO CFO:

Gross margin contracted from 40% to 25% over the three-year period. While FY24 saw top-line expansion, COGS grew disproportionately by 65%, driven by raw material inflation...

⚙ OBJECTIVE MATH GRADING (100% DETERMINISTIC)

All figures and formula results are computed in code templates. Candidate numeric answers are verified against exact keys with strict tolerances (±0.1% or ±1 unit). Zero LLM math error.

📝 OPEN-ENDED COMMENTARY GRADING

The written executive commentary is graded on the candidate's ability to interpret financial drivers and communicate key strategic risks to senior leadership.

4. Table View & Response Panel

`TABLE_VIEW_RESPONSE_PANEL`

Task Types Covered: Bank Reconciliations, Capex vs Opex Journal Entries, Budget Variances, CRM Lead Prioritization.

Lead Prioritization & Pipeline Triage

Prospect	Deal Value	Deal Stage	Days Stalled	Your Priority Bucket
Acme Health	$120,000	Contract Proposal	3 days	High Priority ▼
Apex Logistics	$15,000	Early Lead	45 days	Low Priority ▼
Globex Tech	$85,000	Final Decision	2 days	High Priority ▼

WRITTEN JUSTIFICATION FOR TOP PICKS:

Acme Health and Globex Tech represent $205K in late-stage pipeline nearing quarter close. Focusing immediate outbound effort here protects deal momentum before deadlines...

⚙️ **OBJECTIVE VERIFICATION**

Bank reconciliations and double-entry journals are graded against code-derived accounting keys with partial credit per balanced line. Budget variances are checked cell-by-cell against tolerances.

📝 **OPEN-ENDED RUBRIC GRADING**

Evaluates the candidate's written reasoning regarding ambiguous edge-case accounting treatments or commercial lead prioritization logic.

5. Rich Text Composer

`RICH_TEXT_COMPOSER`

Task Types Covered: Cold Outreach Prospecting Emails, Strategic Account Plans, Cross-Functional Executive Memos.

Deliverable Editor — Cold Outreach Email

B I ≡ List H2

Subject: Fixing junior analyst ramp time at FinTech Global

Hi Sarah,

Noticed FinTech Global onboarded 30+ analysts last quarter. Most controllers find that manual spreadsheet training delays productive modeling by over 90 days.

Are you open to a brief 10-minute call this Thursday to see how simulated assessment modules accelerate ramp time?

⚙️ **OBJECTIVE STRUCTURAL CHECKS**

Automated verification of deliverable components: clear subject line, single explicit Call-to-Action (CTA), and professional formatting.

📝 **OPEN-ENDED RUBRIC GRADING**

Scored against 5-point anchor ladders on hook quality, relevance to buyer pain points, absence of generic spam language, and executive tone.

6. Text Area & Scenario Context

TEXT_AREA

Task Types Covered: Objection Handling, Negotiation Dilemmas, Stakeholder Pushback, Inbox Workload Prioritization.

Situational Judgment — Price Objection

Prospect Objection:
"Vendor B quoted us 30% below your rate and offered free onboarding. If you can't match their discount by end of day, we're signing with them."

YOUR RESPONSE TO THE PROSPECT:

"I understand cost predictability is critical, Mark. Before we discuss discounting, it's worth reviewing why Vendor B excludes live compliance audits—that single gap typically adds 20 hours of manual legal work each month..."

⚙️ **OBJECTIVE COMPONENT (WHEN PAIRED)**

When paired with the Priority Ranking widget for Inbox Prioritization, candidates sequence items in a drag-and-drop list. Ranking order and justification are graded together.

📝 **OPEN-ENDED RUBRIC GRADING**

Graded on reframing objections without defensive posture, protecting contract value, and guiding the conversation toward mutually beneficial next steps.

7. CSV Data Panel

`CSV_DATA_PANEL`

Task Types Covered: Operational Exception Logs, Raw Datasets, Cross-Functional Analytics.

Operational Data Analysis — Dispatch Log

Displaying 24 dataset records

📥 Download CSV for Excel

Incident ID	Warehouse Hub	Delay (Hrs)	Root Cause Category
INC-901	Chicago Central	4.2	Barcode Scanner Failure
INC-904	Dallas North	0.5	Weather Hold

OPERATIONAL ANALYSIS & FINDINGS:

Chicago Central accounted for 68% of total delay hours in Q3. The primary bottleneck is barcode scanner hardware failures during weekend shifts...

⚙️ OBJECTIVE VERIFICATION

Automated validation ensures CSV formatting, headers, and data integrity parse cleanly into both the in-browser grid and downloadable spreadsheet.

📝 OPEN-ENDED RUBRIC GRADING

Evaluates whether the candidate accurately extracts quantitative figures from the data, diagnoses underlying patterns, and writes clear operational recommendations.
